

# Seven Layer Jello

Empty each of the following 3 oz. Jello packages into separate bowls:

black cherry, lime, raspberry, orange, peach, lemon, strawberry

Mix in the order given above.

For the 4 clear layers, mix  $\frac{3}{4}$  cups hot water, stir, then add  $\frac{3}{4}$  cups cold water.

For the 3 creamy layers, mix  $\frac{1}{2}$  cup hot water, stir, then add  $\frac{1}{2}$  cup cold water, and  $\frac{1}{2}$  cup evaporated milk. This will use up one can of evaporated milk.

The 1st, 3rd, 5th, and 7th layers are clear.

The 2nd, 4th, and 6th layers are creamy.

Mix all and then pour the 1st layer into a greased 9x 13 pan. Set the timer for 30 min. Then add the next layer and repeat the process until all layers are finished. Make sure pan is level.
